Summary Statement:

Fueled by a passion for coding, I'm eager to embark on a fulfilling career as a Full-Stack Developer. My journey thus far has been diverse, offering me a wide range of skills from various career paths. Now, stepping into the full-stack development field, I'm excited to leverage my skills to create amazing things. Embracing this new field is thrilling, and I carry a constant thirst for learning in everything I do. Although I'm a junior developer, my experience extends beyond what's listed, bringing a rich set of skills from my diverse workforce background.

Skills:

- CSS/HTML/JavaScript/NodeJS
- Front-End/ Back-End Development
- Bootstrap
- Insomnia/Postman
- Git/GitHub
- Material UI
- APIs
- MongoDB
- ExpressJS
- GraphQL
- Apollo Server
- jQuery
- React
- Fluent in English and Spanish
- MySQL
- Chrome Dev Tools
- Veteran

Experience:

JUNE 2023- DEC 2023

Radioheadz / Full-Stack Application

- From about June 2011 to the present time I have been focused in my original profession, welding and fabricating. This information is not here because it is not relevant my new career path, but is available upon request.

  - Live app link: https://stark-stream-72608-71dba89eb714.herokuapp.com/
  - GitHub repo link: https://github.com/Sal1316?tab=repositories

JUNE 2013- SEP 2022

Welder / Fabricator

- I have been a welder-fabricator for more than 10 years now. The work history is not documented here, but is available upon request.

May 2018 – Nov 2018

Inventory Analyst/ Doka USA

- As the leading supplier of formwork equipment, Doka of Riverside is instrumental in the building of the infrastructure in many arear of the country. As the inventory Analyst, I was part of the Operations department. My job was to make sure our business was running as smoothly as possible. Some of my responsibilities were:
  - o Run a check of our inventory against the prospective bids. Once the contracts have been signed, arrange transport of necessary equipment per contract requirements.
  - o Perform maintenance of our stock to include correcting discrepancies and reorder if necessary.
  - o Since we are one of multiple branches, we had constant contact with each other to acquire the equipment necessary to maintain our stock

Education

JUNE 2023 – DEC 2023

Full Stack Developer/ UCR Extension

After careful consideration, I decided to enroll in the UCR Coding Bootcamp. The program provided a comprehensive understanding of full-stack development, covering both front-end and back-end technologies needed for creating web applications.

SEP 2016 – MARCH 2018

B.S Finance, Real Estate, and Law / Cal Poly Pomona, CA

At Cal Poly Pomona, I maintained a GPA of 3.27. My major was Finance, and as such, the majority of my coursework was analytical in nature. I completed courses such as Financial Modeling, Investment Analysis, Corporate Finance, Evaluation of Financial Policy, Multinational Financial Management, Real Estate Investment Analysis, Fundamentals of Real Estate, Statistics, Excel VBA, and Financial Institutions and Markets
